EXPERIENCE

TECHNICAL HUB | AWS Development Intern
May 2024 – Jul 2024 | Surempalem, AP
- During this tenure, the trainee worked with the technology AWS Development and excelled in major concepts.
- Cloud9 IDE
- AWS SDKs and Boto3
- API Gateway Serverless Function

GHOST CODER | Member
Dec 2024 – Mar 2025 | Rajamundry, AP
- Wrote guides and generated code examples on programming languages, data structures, and algorithms (DSA)
- Used SEO practices to boost visibility and collaborated with developers to ensure content accuracy
- Responded to reader feedback to enhance content quality.

PROJECTS

RESPONSIVE MOVIE RECOMMENDATION | Developer
GITHUB
- Established a responsive movie recommendation app using React.js and Tailwind CSS, integrating IMDb API for movie data and recommendations
- Designed dynamic UI elements to enhance user experience, ensuring cross-device compatibility and optimized performance

RESPONSIVE PORTFOLIO | Developer
GITHUB
- A stunning, responsive portfolio showcasing my skills and expertise in web development. Built with cutting-edge technologies like Next.js, Tailwind CSS, and Framer Motion, this portfolio provides a seamless user experience across various devices and screen sizes.

BLOCKCHAIN-BASED BOOK CHECKOUT SYSTEM | Developer
GITHUB
- This project implements a simple blockchain system to track book checkouts in a library or book management system. It provides a REST API to add new books and record book checkouts, with each checkout being stored as a block in the blockchain.

SIMPLE NUTRITIONAL CALCULATOR REACT ,GO | Developer
GITHUB
- A lightweight, efficient nutrition tracker built with Go (backend) and React (frontend). Calculates calories, macros, and micronutrients from user-input meals, with a clean UI and fast API responses
